### How To Contact Us

Our Website:

[www.pmspower.com](http://www.pmspower.com)

Our Phone Number:

715-423-2533

It's that time of year again when we lose an hour of sleep, but we gain an hour of day light, or so it seems. **REMEMBER** to turn your clock **AHEAD** Sunday, March 8, 2009. For many people this is a sure sign that spring is on the way, which means warmer weather is just around the corner

### Another Good Reason

We all know this is a good time to change our batteries in our smoke alarms at home, but did you know it is also a good time to make sure that all of your other equipment is in good working condition? Did you ever

wonder what would happen if the equipment that you counted on to do your job just stopped working? We don't want this to happen to you while we are around. At Power Management Solutions we truly believe in Preventive Maintenance. Our preventive maintenance includes, replacement of batteries and fans, cleaning of the unit, and recycling of old materials. Let us deal with the worry of keeping your equipment in good running condition at the office. This will allow you more time to do the same at home. Not many people think of pulling out the refrigerator and cleaning the coils or cleaning the drier vent of old lint. With these simple chores we can insure that your equipment at home is running in tip top shape for the upcoming year.

## How Power Management Solutions Can Help You

You say that you need batteries, "We have those." You say you need someone to come out to provide preventive maintenance, "We can do that!" Check out our website at [www.pmspower.com](http://www.pmspower.com) or call one of our knowledgeable office employees for more information about the type of batteries that we handle, you'll be amazed at the price.

## What to Expect When We Arrive

When we come to your office you can expect that we will treat your equipment as our own. Our technician will check the equipment for any malfunctions, check to see if the fans or batteries need to be replaced, clean the equipment, and recycle any old equipment. If the batteries or fans need to be replaced, we will get them ordered within 24 hours. After we receive the batteries in our office, our technician will switch out the old for the new ones.
